About Us-Company Profile

Ratba'a Contracting Company is An Iraqi based construction contractor established in 2001 as a limited liability company. The founders started the company targeting the local market with an eye on the regional markets. Over the 15-year, the unremitting dedication and hard work of its distinguished professional team, along with the willpower and determination of its founders, have all granted Ratba'a the aptitude to construct several specialized projects in various Iraqi Governorates . Adherence to international practices in environmental, Safety, and Quality management as well as Project Management Standards, has granted the company great deal of recognition. In the year 2014, Ratba'a Contracting was the one of the precursors Iraqi companies to achieve the ISO 9001:2008 certification, The Quality Management System, and after about 1 year, the company has achieved the Environmental Management System Certificate ISO 14001, and the Safety Management System Certificate ISO 45001 .In 2001. Ratba'a Contracting Company is classified as a "First Grade General Contractor" as per the Ministry of Planning - Iraq, with a first grade classification in all eight specializations, namely; Building Construction, Roads Construction, Concrete Works, Earthworks, Electro-mechanics, Communication Networks, Water & Sewerage, and Decor & Furnishing Works. With current workforce in excess of 400 permanent employees and unlimited temporary employees, and annual turnover in excess of 60 million USD, Ratba'a Contracting Company is clearly one of the leading and the largest reputable Iraqi construction contracting company in Southern Iraq. The Company Key Personnel are rigorously selected from the highest caliber with considerable experience. The company's wide range of construction resources, including heavy earthwork machineries, asphalt machineries, tower cranes, air compressors, and power generating sets, in addition to the huge stock of state of the art formworks and scaffolding systems as well as owned fleet of mobile cranes, water tankers and trucks and mobile site offices & residence caravans, have attracted numerous regional and international companies to joint venture with the company in constructing several notable landmark projects of Oil & Gas in Iraq .The management's discerning vision has enabled Ratba'a to meet the demanding requirements of new specialties with the capability to adapt and respond quickly and effectively to the rapid expansion of the rigorous market demands, hence, Ratba'a Contracting Company has maintained high level of readiness to qualify for and execute major industrial projects.

Management Systems –Quality Management System

RATBA'A was one of the first private Iraqi contracting companies to acquire the ISO 9001 certification. Our quality management system has been modified to comply with the new version of the standard and we acquired the ISO 9001: 2008 certificate in 2014.

Since inception, Customer Satisfaction was one of the main distinctions of **RATBA'A**. We at **RATBA'A** believe that this goal can only be achieved by providing our Customers with the highest quality level of work and efficient services. Quality awareness and training are provided for all of the project staff prior to the commencement of actual execution of works. We are continually striving to improve our performance through carrying out site quality audits to inspect and verify compliance with our quality management system and the project's quality plan that is prepared directly after contract award.

Management Systems –Control Systems

All programs and action plans adopted by the company are subject to monitoring and follow-up processes at various stages.

Check points and milestones are added as stages in all action plans for progress and performance measurement.

RATBA'A Contracting Co. controls the deviation from its implemented action plans through the corrective and preventive actions system in terms of quality, cost and time.

RATBA'A Contracting Co. is adopting and utilizing a comprehensive computerized information system. Each Division &/or department gathers the required information on regular basis as required by the controlling procedure(s) applicable to it. Information Systems in the company include the followings:

- **Human Resources Management System;**

- Performance Appraisal
- Training Needs & Plans System

- **Cost Control System;**

- Stores and Materials System
- Labor Time Sheet System
- Sub-Contracting System
- Plant& Equipment System
- Project Petty Cash System
- Overheads System

- **Project Budgeting System**

- **Purchasing System**

- **Suppliers' and Sub-Contractors' Evaluation System**

- **Invoicing System for the Projects' Owner**

- **Accounting System**

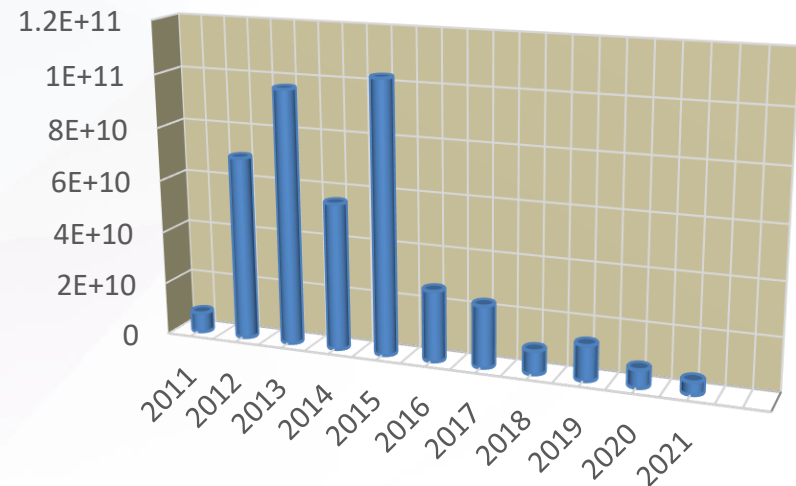

- **Fixed Assets System**

- **Maintenance Management System**
